Be Part of the **Next Generation Wiki**

Blockchain-based

## THE FIRST BLOCKCHAIN-BASED, SOLUTION-DRIVEN WIKI

Tired of googling to find the right solution or waiting for that yahoo answers response? Our vision is for a community-based information knowledge base that quantifies the most popular solutions for issues and directly link the users to the relevant products and services.

### THE GAP

The growth of information has expanded exponentially. Currently, finding the right solutions is the job of the users. Even then, **solutions that are important to the information requested are often not delivered. Solutions that are delivered are often not quantified.**

### THE WIKIBITS SOLUTION

Unprecedented developments in information technology, blockchain technology, social media and artificial intelligence bring the world closer than ever to the formation of a community-based, solution-driven knowledge repository, prospect exists for solving daily tasks, discovery and innovation. **Wikibits has the potential to become THE GO-TO PORTAL for solutions, relevant products and services.**

### THE WIKIBITS DIFFERENCE

 Google	Search portal, results are general	 Community-based and solution-driven results
 Yahoo Answers	Community-based response, results lack quantification of effectiveness and efficacy	 Quantification of solutions provided based on community response
 Wikipedia	Information giant, community-based response, voluntary	 Community contribution is directly rewarded with WIKI tokens

### WIKIBITS IS TARGETING A \$2 TRILLION MARKET

### WIKI TOKEN

The WIKI token is the fuel for the Wikibits platform. User's contributions are directly rewarded using WIKI tokens and advertisers enjoy special discounts.
