Wikibits

Be part of the **NEXT GENERATION WIKI**

ABOUT US

Wikibits is a solution-driven wiki where solutions for problems and issues are tabulated based upon community inputs. Our platform provides transparent, quantified and proven solutions to our users: providing the effective solution to the right people at the right time. To alleviate the burden of finding the relevant products and services, Wikibits automatically links the users to online tutorials, sites and nearby stores.

WIKIBITS CRYPTOCURRENCY

The growth of cryptocurrency market (e.g. bitcoin) have eclipsed the returns of traditional investment vehicles. Forbes and The Economist have coined this period as the “Digital Gold Rush”. As the cryptocurrency market evolves, another emerging venue cryptocurrencies have been used for is to allocate company tokens for purchase. Purchase WIKI tokens and grow with us for the development of a portal that is a combination of the best features of Google, Wikipedia, Yahoo Answers and Quora.

THE WIKIBITS DIFFERENCE

Search portal, results are general

Community-based response, results lack quantification of effectiveness

Information giant, community-based response, voluntary

Community-based and solution-driven results

Quantification of solutions provided based on community response

Contribution is directly rewarded with WIKI tokens
